"Partners In Production"

Option 1 — New Turnkey Design

We'll work with you to create the innovative new design which will perfectly suit your requirements.

Count on your Partners in Production from start to finish.

- Concept
- Design
- Prototype
- Assembled product

Option 2 — Improve or Redesign Your Existing Product

API's modular platforms allow you to redesign and assemble a new control using our readily available, proven technologies.

- Proven platforms to design and build your controls
- Options to add new functionality or features

Option 3 — Change Your Approach Fast with API's Proven Modules

API offers standard products that will often meet your immediate needs. Our lines feature fully programmable modular input/output control boards with wireless options, as well as Ethernet I/O boards.

- Self-contained
- Highly adaptable
- Rapidly deployable
- Control platform
- Unique to your needs
- Minimal development time/cost
- Low to high volume capabilities

Option 4 — API Assembles Your Existing Design & Products

We can effectively build your current products or sub-assemblies.

- Contract assembly services
- Build to print
- 5 option procurement plan
